Dr. Huang He-Feng is a reproductive medicine specialist, Academician of CNAS, a Fellow Honoris Causa of the Royal College of Obstetricians and Gynecologists of UK, Academician of the Academy of Sciences for Developing World, and a member of the Chinese Academy of Medical Sciences.

She holds the titles of Chief Physician, Professor, and PhD Supervisor in Obstetrics and Gynecology. Currently, she serves as the Dean of the School of Medicine, the Dean of the International School of Medicine, and the Honorary Dean of the Women's Hospital, School of Medicine, Zhejiang University, and the Director of the Key Laboratory in Reproductive Genetics of the Ministry of Education.

She is the first in the world to propose the hypothesis of "gamete origin of diseases" and has conducted groundbreaking research on the intergenerational and transgenerational genetic and epigenetic mechanisms of paternal/maternal originated diseases. She has established international cooperative health life trajectory cohorts for multicenter cluster randomized interventions in childhood obesity spanning pre-pregnancy, pregnancy, infancy, and birth cohorts for assisted reproductive technologies.

By integrating innovations in reproductive and genetic technologies with clinical translations, she aims to reduce the risk of chronic diseases from the very beginning of life and prevent the transmission of genetic birth defects.

She has made numerous achievements, including the National Award for the Advancement of Science and Technology that she received in 2010 and 2021, respectively, the highest honor bestowed upon researchers and scientists in China. She has published more than 350 papers and trained more than 200 postgraduate students.
